

No Protests Are Filed on Bridge

St. Albans and Nitro Res- idents Indorse Project

No protests from the standpoint of navigation against the proposal to construct a bridge over the Kanawha river at St. Albans were filed yesterday at a hearing held at St. Albans by Lieutenant A. M. Nellson of the Charleston sub-office of the United States river engineers and E. T. Ketchum of the permit division of the district engineer's office at Huntington.

St. Albans proposes to finance the construction of the bridge with a grant of \$365,000 which the city has asked of the Reconstruction Finance corporation.

Several score residents of St. Albans and Nitro appeared at the hearing to give their approval of the project.

The bridge would connect state highways Nos. 25 and 60.
